In countries where bread is a staple,
people often say garaetteok
“feels like chewing rubber.”

This chewy texture will be a major barrier in making
tteokbokki popular worldwide.

Western consumers hate
overly sticky and chewy
textures.

They prefer foods that are soft and easy to eat,
rather than foods they have to chew for a long time.

TTEOK

In regions where people seek more efficient lifestyles, garaetteok is considered a time-consuming and labor-intensive task.

As a result, many people find the process of making complicated and time-consuming.

Many Westerners dislike the unique chewy texture of tteok.

They tend to prefer softer textures, so you'll often hear, "The texture is too chewy." or "They don't enjoy it."

Pain Point

Consumers are dealing with **dense texture of frozen tteok.**

✓ Frozen Tteok Consumer VoCs

The texture was poor and it tasted stale

The tteok was too firm and the texture was dense

The tteok was so thick it was hard to chew.

✓ Causes of Texture Deterioration

Frozen food quality is affected more by **the thawing process** than by freezing.

Starch retrogradation is affected by storage conditions, moisture conditions, and additives.

Pain Point

And **cooking it** is even more difficult.

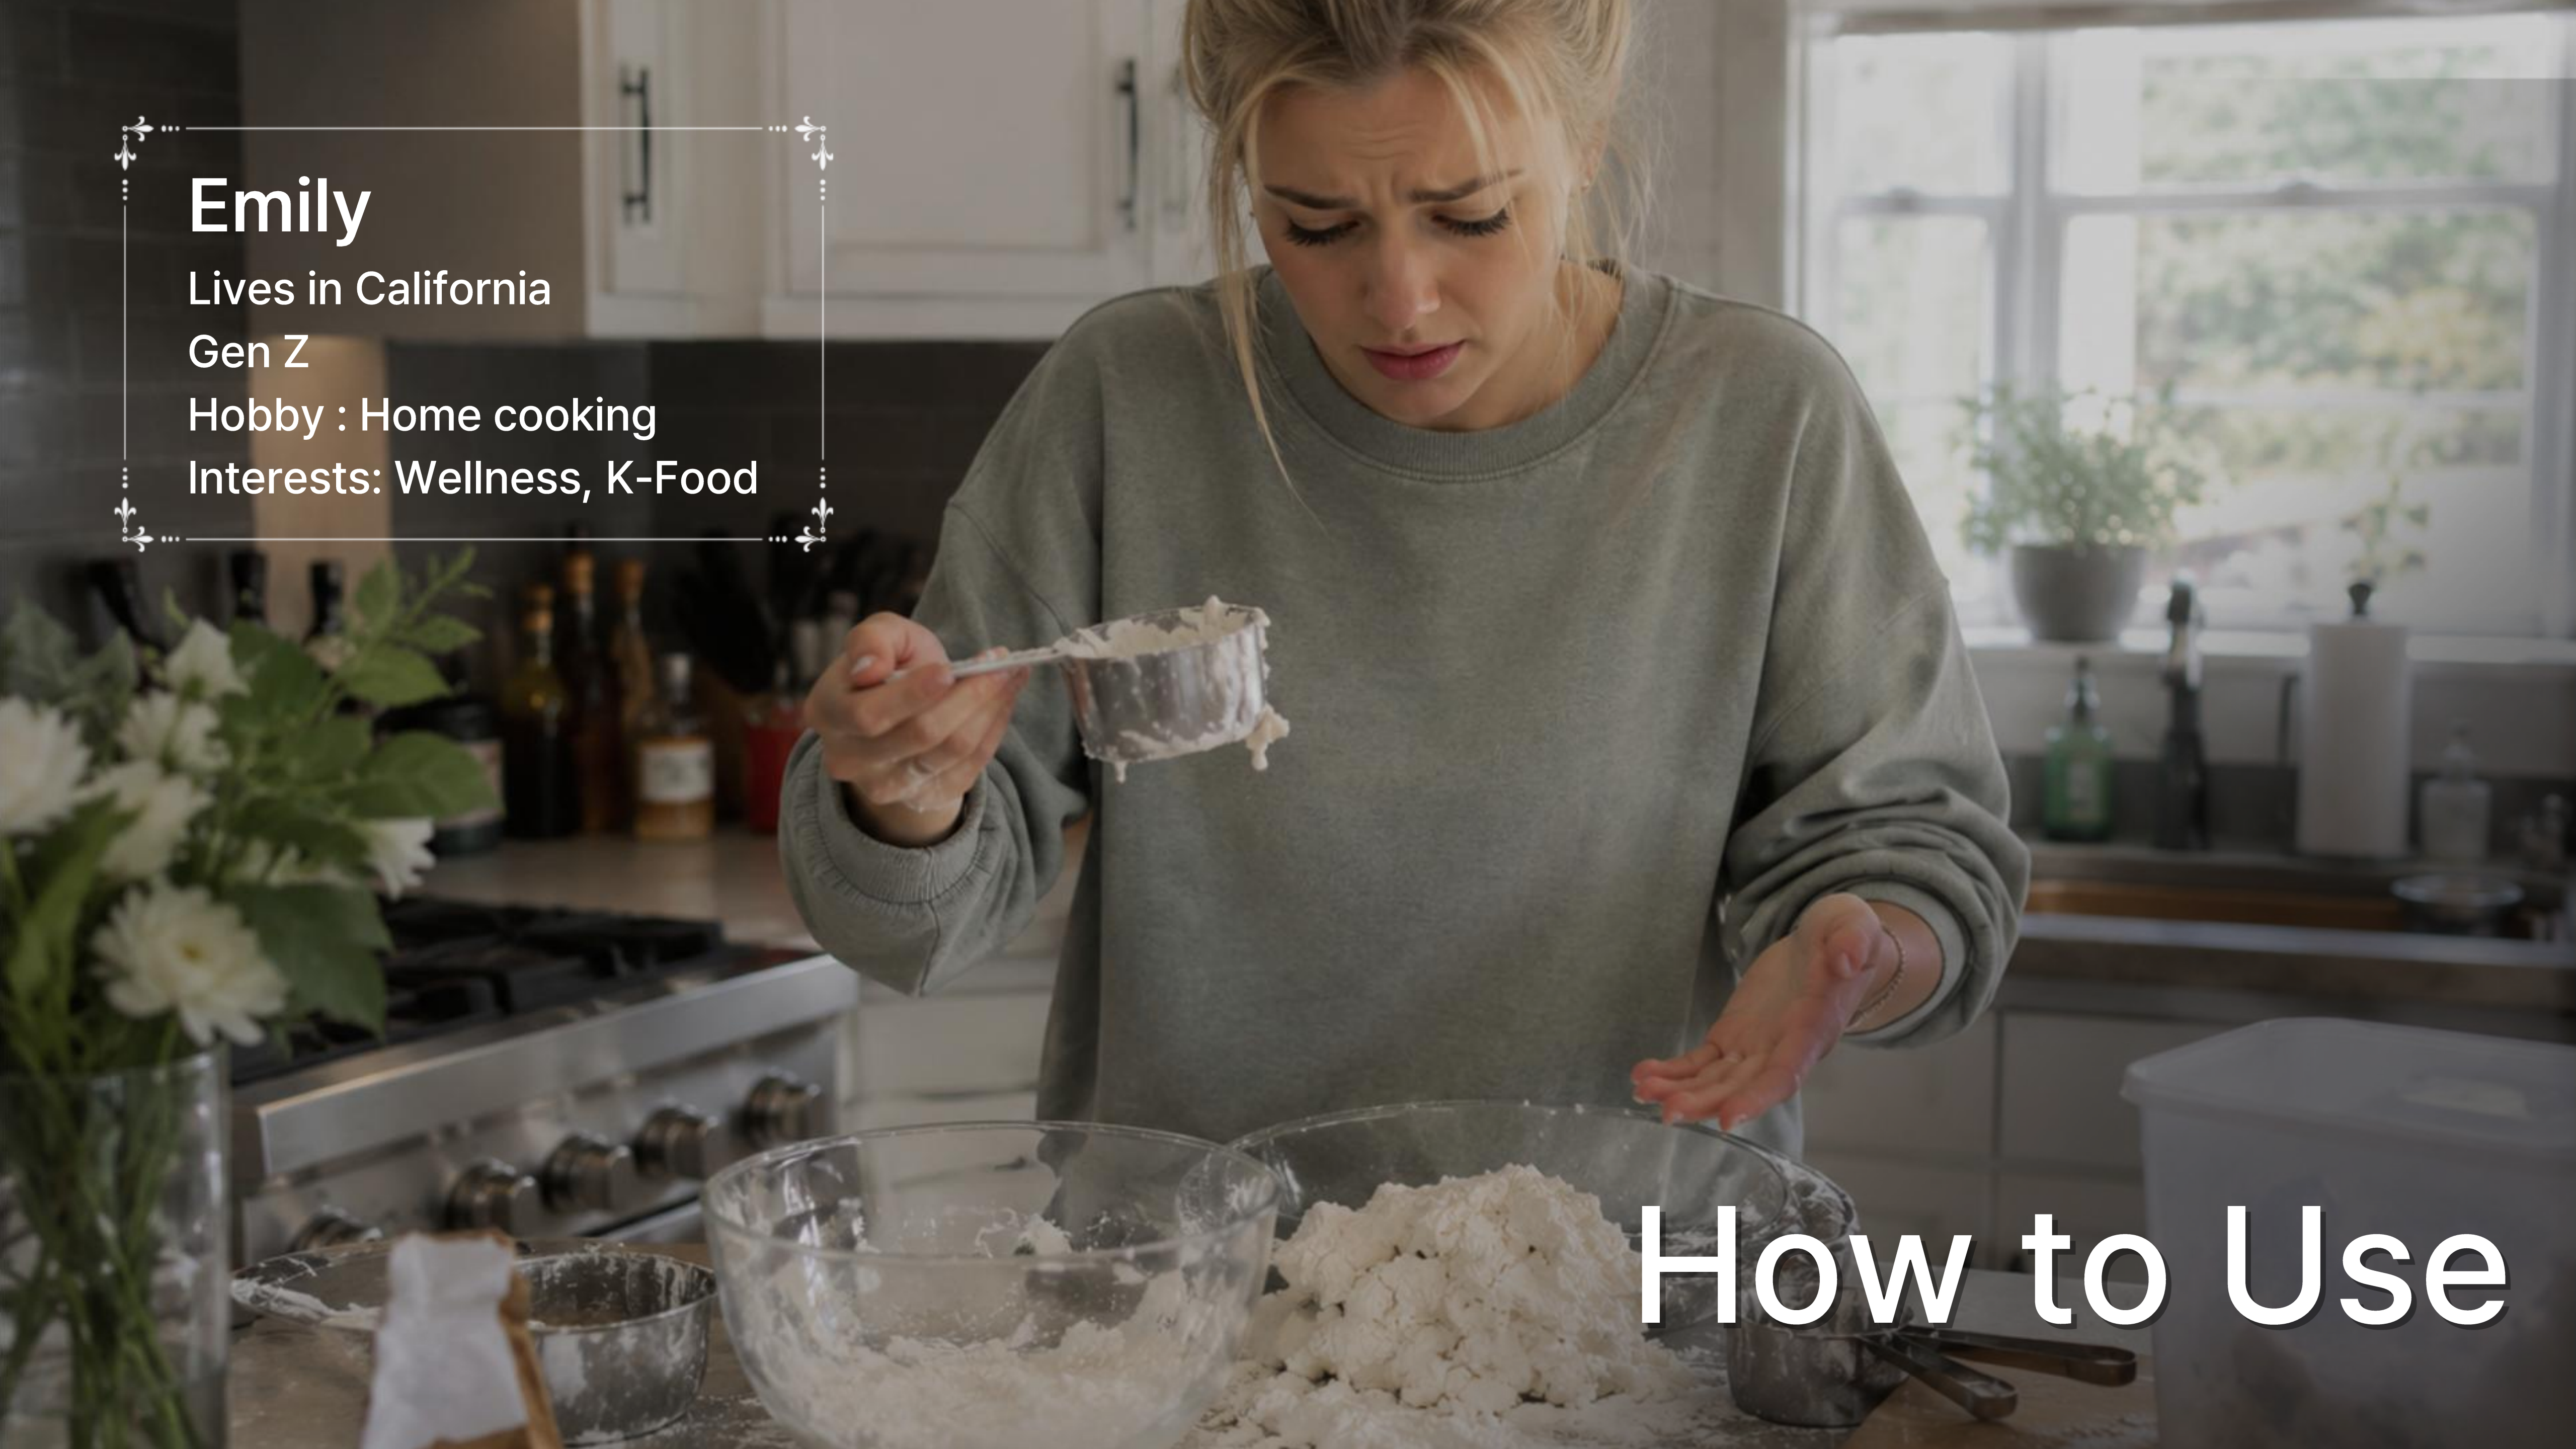

***What if the product has
both TASTE & CONVENIENCE?***

then comes chewy rice cakes — this is our **K-Tteok premix**.

A woman with blonde hair tied back, wearing a grey sweatshirt, is in a kitchen. She has a frustrated expression, with furrowed brows and a slight frown. She is holding a small metal cup with a spoon, and some white substance (possibly batter or dough) is dripping from it. In front of her are two large glass bowls filled with a white, crumbly substance. The kitchen background includes white cabinets, a window with a plant on the sill, and a stove with a vase of white flowers on the counter.

◆‘글루텐 프리’ 프리미엄 간식으로 인식=한국농수산식품유통공사(aT)가 2024년과 2025년 공개한 ‘미국 떡류·시장 보고서’는 이러한 성장의 배경으로 ‘클린 라벨(Clean Label)’ 전략을 꼽았다. 보고서는 “미국 시장에서 떡은 ‘글루텐 프리’ 식품이자 첨가물이 없는 ‘건강한 탄수화물’로 인식되며 프리미엄 간식 시장에 안착했다”고 분석했다. 또 K-문화의 영향으로 떡볶이에 대한 관심이 높아지며 거리감이 줄었다고 설명했다. 현지 소비자의 니즈와 트렌드를 파고든 것이 수출 단가 상승을 견인했다는 평가다.
